After observing the downward spiral of her moms health, she examined the aging process, noting how many symptoms reveal characteristics of early childhood development. From extensive research and observation of the cognitive decline in elderly family members and other elderly adults, Denise found that one of the key elements to sustaining quality of life was communication. Denise developed activities to promote interaction. Handbook of Activities for the Elderly includes a variety of meaningful activities that are practical and manageable to implement. The activities are broken into four categories: physical environment, social-emotional, nutritionfitness, and language and cognition.
