## Photosynthesis in the Marine Environment

By Sven Beer, Mats Bjork, John Beardall

John Wiley & Sons Inc. Paperback. Book Condition: new. BRAND NEW, Photosynthesis in the Marine Environment, Sven Beer, Mats Bjork, John Beardall, "Marine photosynthesis provides for at least half of the primary production worldwide." Photosynthesis in the Marine Environment constitutes a comprehensive explanation of photosynthetic processes as related to the special environment in which marine plants live. The first part of the book introduces the different photosynthesising organisms of the various marine habitats: the phytoplankton (both cyanobacteria and eukaryotes) in open waters, and macroalgae, marine angiosperms and photosymbiont-containing invertebrates in those benthic environments where there is enough light for photosynthesis to support growth, and describes how these organisms evolved. The special properties of seawater for sustaining primary production are then considered, and the two main differences between terrestrial and marine environments in supporting photosynthesis and plant growth are examined, namely irradiance and inorganic carbon. The second part of the book outlines the general mechanisms of photosynthesis, and then points towards the differences in light-capturing and carbon acquisition between terrestrial and marine plants. This is followed by discussing the need for a CO<sub>2</sub> concentrating mechanism in most of the latter, and a description of how such mechanisms function in different...
