

Teaching Chemistry with TOYS (Paperback)

By Jerry Sarquis, Mickey Sarquis, John Williams

Terrific Science Press, United States, 1995. Paperback. Book Condition: New. 277 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.As a child or as an adult, most of us find it difficult to walk past a colorful display of toys without pausing, smiling, and taking a closer look. The urge to roll the truck down the hill, bounce the Silly Putty, or wind up the walking dinosaur is nearly irresistible. We typically associate toys with fun, discovery, and creativity. In contrast, if presented with a display of chemistry and physics experiments, fun, discovery, and creativity unfortunately would not be the words that come to most peoples minds. Our idea was to teach basic chemistry and physics principles using toys, thus capitalizing on the natural attractiveness of toys and also showing that physical science is an integral part of our everyday experiences. Exciting projects use ordinary toys and play materials to demonstrate chemistry principles. 42 activities grouped separately for grades K-3, 4-6, and 7-9 296 pages Grades K-9.

Reviews

This book is indeed gripping and fascinating. It normally is not going to price a lot of. I am very easily will get a delight of reading a created pdf.

-- **Albertha Cartwright**

Very good e-book and valuable one. It can be writter in basic words and phrases and not confusing. You will not really feel monotony at whenever you want of your own time (that's what catalogues are for concerning should you check with me).
